## About Me

I'm Owen Davis, a Human-Centered Computing student at the Rochester Institute of Technology (RIT) with experience developing and deploying production-level websites for large organizations. I bring a strong foundation in user-centered design and technical implementation, with a focus on building responsive, accessible, and intuitive digital experiences. I thrive in collaborative environments, take initiative when solving complex problems, and approach every project with a high level of interest and commitment.

## Experience

### Archdiocese of Denver - Department of Marketing and Communications Web Development Specialist

December 2025 - Current

- Develop and maintain production-level websites within structured environments.
- Implement responsive front-end features to improve usability and accessibility.
- Collaborate with a team of Directors to bring forward their visions.
- Diagnose and resolve live-site issues in real-world deployment environments, ensuring reliability and performance.

### Archdiocese of Denver - Department of Marketing and Communications Web Development Intern

August 2025 - December 2025

- Supported the development and restructuring of web platforms, assisting with front-end implementation and content organization.
- Conducted a research project evaluating AI-powered website builders (Wix AI), analyzing their feasibility, limitations, and strategic value for large web ecosystems.
- Collaborated with communications and leadership teams to translate organizational needs into functional web updates.
